

Hi Paula

Thank you so much for having our Omokoroa No.1 Junior School. Each class and teacher have had such positive things to say about the programme, and the amazing facilitators!

You have created such an enriching new programme that I'm sure many others will also enjoy and learn from.

Here is the feedback we have for you:

We had 4 Junior classes visit the Western Bay Museum, Katikati over 3 days. Our Programme was focused on Communication in the Past and Present and Caring for our Environment.

The children were all actively involved and focused on their learning. They took part in wonderful hands-on, engaging and relevant activities with the museum facilitators. They had clear expectations, were relational and kept the group engaged. The time frame for each group session was perfect!

The children were able to write and post a letter, talk with a string telephone, and see, and use an old telephone exchange. Paula discussed with them the importance of looking after our environment. The children were able to see predators and discuss their impact. They also learned about the importance of looking after our beaches and saw the impact we have on our oceans by rubbish left behind.

The classes had lots of fun. Accompanying parents were very impressed with the activities as well, and said they would return with their own families to visit.

Thank you for such an enriching, interactive and informative trip!

We appreciate you all and what you offer to our community!

Kind regards,

Melanie
